SKILLS

Java Intermediate ● ● ● ○ ○	Salesforce Intermediate ● ● ● ○ ○
Apex Intermediate ● ● ● ○ ○	HTML5 Expert ● ● ● ● ●
CSS Preprocessors Advanced ● ● ● ● ○	React Intermediate ● ● ● ○ ○
Angular Intermediate ● ● ● ○ ○	Lightning Web Components Beginner ● ● ○ ○ ○

EDUCATION

Virginia Commonwealth University
Bachelor's, Communication Arts
(August 04, 2015 - May 11, 2020)

WORK EXPERIENCE

Revature LLC
Salesforce Developer

(March 21, 2022 - July 15, 2022)

- Developed and customized Salesforce orgs to optimize communication, increase productivity and optimize processes.
- Developed custom Lightning Web Components for client-facing websites of Salesforce orgs using HTML, CSS, and Javascript.
- Used Apex to customize functionality and create features for Salesforce to help with Marketing Campaigns and Events.
- Coordinated with team members to work within the Agile methodology to deliver on sprint goals.
- Thoroughly tested code against unit tests, documented bugs both in development and production environments, and collaborated with other developers to recreate and troubleshoot bugs.

Infosys
Frontend Developer

(January 07, 2021 - December 03, 2021)

- Worked in collaboration with Verizon to improve and enhance their internal software, as well as attended numerous trainings and completed enterprise-level projects for clients.
- Specialized in front end technologies including HTML, CSS, JavaScript, Angular, and React.
- Assisted team lead in maintaining support services and process efficiency and effectiveness by coordinating with other team leaders regarding program implementation and direction.
- Maintained a library of components through documentation of components and bugs, collaborating with others to troubleshoot bugs, and conducting feedback sessions with clients to improve quality.

Revature LLC
Software Developer

(August 04, 2020 - December 31, 2020)

- Communicated with and collaborated with developers to complete various enterprise-level projects.
- Provided assistance within training, ensuring that information received was accurate, and proficiently delivering training to peers, resulting in increased knowledge, understanding and skills.
- Developed full-stack web applications in HTML, CSS, Angular, Java, and microservices.
- Created unit tests and test suites to thoroughly test code against and collaborated with others to document bugs and resolve them.

PROJECTS

Trial of the Titans Learning management system <ul style="list-style-type: none">Collaborated with 10 other people to create a Salesforce org complete with a client-facing website utilizing Lightning Web Components and various automation processes in the backend.Developed a flow process for users to submit projects that display their understanding of a particular topic.Created web components for use on various pages using HTML, CSS, and Javascript, following site design mockups done in Figma.	CANVAS Library Component library <ul style="list-style-type: none">Built both Angular and React components within monorepoUsed Storybook to write documentation for componentsDeveloped components in React that displayed charts of varying typesProvided support to clients and users of the library by conducting feedback sessions, one-on-one meetings, and troubleshooting bugs with developersTracked ongoing issues and projects in an agile methodology environment using Jira
---	---

Revature Swag Shop
Company shop

- Collaborated with 20 other developers in smaller teams of 5 in an agile methodology environment
- Developed a design system for the front end in Angular and Sass
- Implemented a multiple cart feature on the back end in Java
- Wrote extensive documentation for both the front end and back end in Github wiki
- Used Git and Github to version control the project
